

# Receiving Inspection Procedure & Checklist for Samson PVP Enrolled Cattle (MDCL 230108)

1. Obtain affidavit from the shipping supplier.
2. Unload trucks. Check cattle as they are unloaded to be sure they have a Samson PCT. If the tag is missing, segregate the calf into a holding pen until its status is determined. Maintain segregation of all the cattle until individual receiving inspection is performed.
3. If any ear tags are missing, check the truck for the missing tag(s). Match up any secondary identification with the cattle missing the Samson PCT. If positive ID cannot be established, the calf will be disqualified from the Samson PVP. Notify shipper of discounts to be applied if any.
4. Scan cattle for any unusual appearances with consideration to age, condition, and frame size. Note tag numbers of suspect calves for closer examination at the time of next handling.
5. At the time of next handling, verify ID's with the ID's on the supplier manifest.
6. Turn in completed work sheets to the main office and Samson, LLC for review and filing.
